

Lightning fast Scanning

SAVEO-BLT-H12D Quick Start Guide

Package Contents:

- 1 x Saveo BOLT scanner (SAVEO-BLT-H12D)
- 1 x USB Type-C Device Flex Cable (SCF002)
- 1 x Charging Cradle (SPP004)
- 1 x Micro USB Device Flex Cable (SCF001)
- 2 x Uni-Device Mount Plates (SMX3MP)
- 1 x Wristloop, Acc. Bag & USB Reset Key

Limited Warranty

Saveo BOLT has an extended 2 -year limited manufacturer warranty. This warranty does not cover any product which has been subject to improper use, neglect or unauthorized repair or installation. This warranty does not cover consumable parts. (Cables & batteries are consumables.)

Important Safety Information

- * Never put scanner in places of extremely high temperature.
- * The included charging cradle must be used indoors only, in fully dry conditions.
- * Never damage the internal rechargeable battery. Damaging the casing of the rechargeable battery might cause explosion or fire.

* DANGER! Never directly look into the scan windows whilst the device is active. DO NOT point the beam at any persons or animals.

Operating Elements

Attach your phone to the scanner

Using the Universal Device Mount System

Each 3M™ VHB™ mount plate requires a clean flat surface in order to create a permanent, screwless bond. Whilst you can choose to affix this mount plate directly to the phone, we recommend affixing this plate to a rugged dual-layer or hard-shell device case as the screwless bond formed is permanent.

Affixing the mount plate

1. Clean your case or device surface with included wet and dry wipes.

2. Carefully place the clean rugged case (or device) on a flat surface.

3. Peel off 3M VHB adhesive covering paper and carefully affix the mount plate approximately 2/3 toward the lower end of your case or device surface.

Securing phone to your scanner

Simply align the square buckle to the mount seat and push down to secure your device in place.

To release and remove your device, simply press the quick release orange button.

Universal Device Mount Illustration

A custom rugged dual case (SBB005) can be fixed-mounted directly to the top of the scanner. Dual layer cases have two components, an inner silicone cover and an outer layer of hardened polycarbonate.

The Phone and silicon cover are inserted into the outershell.

The hardened polycarbonate outer shell is attached securely to the scanner via a universal mount plate, which utilizes an ultra-strong 3M™ bonding adhesive.

Connect your device using the Flex-Protect Micro-USB, USB Type-C or Lightning® cable.

Please Note: The wired connection supports charging on all connected devices and data transfer on USB OTG capable devices only.

Getting Started

Power On the scanner / set for your device cable type

1. Press the scan trigger to turn scanner on. The scanner will beep once to indicate it has powered on.
2. Please select Micro-B or Type-C mode to set charge & data for the device you wish to use with your scanner.

USB Type-C / Lightning® (Default mode)

Micro USB (B)

IMPORTANT CRADLE CHARGING INFORMATION

In order to support fast optimal device charging, Saveo BOLT's Charge Cradle has been designed to use the original manufacturers USB cable and power adaptor which was included with your specific mobile device.

Please optimize your device cradle charging experience with the appropriate cable type settings barcode, above.

In the case of using an Apple lightning device, a special cable kit add-on part (SCF003-KIT) is available to order, which includes:

- 1 x Premium USB Type-C cable (SCUSBC)
- 1 x Flex-Protect Lightning device cable (SCF003)

LED Indicators

Please refer to the table below for information regarding LED status indicator for the scanner.

Indication	LED Color	Indication
Charging		Solid Amber LED (whilst charging)
Fully Charged		Solid Green LED (whilst charging)
Bluetooth Mode (not connected)		Blinking Blue LED (whilst operating)
Bluetooth Mode (Connected)		Solid Blue LED (whilst operating)
USB Mode Only (not connected)		No LED (whilst operating)
USB Mode Only (connected)		No LED (whilst operating)
Low Battery Alert (-15% Battery)		Blinking Red LED (0.7 sec intervals)
Low Battery Alert (-8% Battery)		Blinking Red LED (0.3 sec intervals)

Connecting via wired USB (HID)

Scan the Wired USB HID Communication barcode below:

Confirm scanner is connected

Saveo BOLT is detected by your smartphone as an external keyboard. A message or an 'A' letter symbol will appear on the top of the screen to notify you that a USB Keyboard device has been connected.

Once, connected, you'll be able to scan into any app or the web browser, where the cursor is focused.

Connecting via Bluetooth (HID)

Scan the Wireless Bluetooth HID Communication barcode below:

Select SAVEO-BLT-H12D-***** to connect

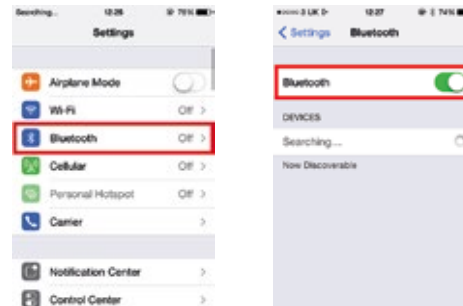

Saveo BOLT will appear as an external keyboard with a unique identifier number (SAVEO-BLT-H12D-SERIALNO).

Select scanner from "Available Devices" and wait for pairing process to complete.

Enable Bluetooth on your device

Go to your phone's homescreen and find "Settings", then "Bluetooth" and turn Bluetooth on. Your device will search for available devices within range.

Devices are now paired

Once "Connected" is displayed, your device is paired to the scanner. Your scanner is now ready to use.

Please Note: Devices only need to be paired once. When they are within Bluetooth range they will automatically attempt to connect to each other. If you wish to connect to another device, it is recommended you first unpair this device. Unpairing can be done by holding the scanner device trigger for 10 seconds.

Alternative Connection Modes

Please note: You will require a compatible application in order to use either of these connection methods.

USB V-COMM

Bluetooth SPP

Triggers Mode

The default setting for Trigger mode is Single Scan. To choose another mode please scan the appropriate barcodes below.

Single Scan (Default)

In this mode - the scanner attempts to decode when the scan button is pressed.

Motion Sensor: Full Auto Mode

In this mode - the scanner attempts to decode when it senses motion.

Continuous

In this mode - At power up the lighting and decoding are on all the time. The trigger is not used.

Toggle

In this mode - Aimer and decoding is on when trigger line is activated. Activating the trigger line again turns the aimer and decoding off.

USB HID Transmission Speed (Wired)

Transmission speed is dependent on your device. In order not to lose data please choose the correct speed. Mid Speed is the default.

High Speed Transmission

Mid Speed Transmission (Default)

Low Speed Transmission

Bluetooth Transmission Speed (Wireless)

Transmission speed is dependent on your device. In order not to lose data please choose the correct speed. Mid Speed is the default.

High Speed Transmission

Mid Speed Transmission (Default)

Low Speed Transmission

Power Management

Power saving mode is enabled by default and will put the scanner to sleep after 1 minute of inactivity. To wake up the scanner press the trigger.

We recommend matching the Power Save timeout duration on your scanner and mobile device. Settings-Display- Timeout

Disable

Scan to disable power saving mode

1 Minute (Default)

Enter Power Saving Mode after 1 minute inactivity

3 Minutes

Enter Power Saving Mode after 3 minutes inactivity

6 Minutes

Enter Power Saving Mode after 6 minutes inactivity

12 Minutes

Enter Power Saving Mode after 12 minutes inactivity

30 Minutes

Enter Power Saving Mode after 30 minutes inactivity

1 Hour

Enter Power Saving Mode after 60 minutes inactivity

2 Hours

Enter Power Saving Mode after 120 minutes inactivity

Sleep immediately
Enter Power Saving Mode immediately.

Data Operating Modes

There are two operating modes on the scanner, **Data transmission mode** and **Data Storage Mode**. Scan the appropriate barcodes when switching between these two modes.
Please note: Switching between modes will wipe the scanner's internal memory.

Data Transmission Mode (Default)

The default setting is Data Transmission mode. In this mode data will be sent to smartphone/tablet directly.

Enter Data Transmission Mode

Data Storage Mode

In this mode, data will be saved directly to scanner's memory. Scan **Transmit Memory Data** to receive data stored on scanner's internal memory.

Enter Data Storage Mode

Data Storage Mode Function Codes

Reset to Defaults

Factory Reset to Defaults

To perform a full factory reset configuration to default, scan the barcodes below in order, 1-3:

1.

Factory Reset Saveo BOLT Board

Factory Reset EX25 Scan Engine

2.

Initialize EX25 Scan Engine

3.

2

USB / Bluetooth Auto-Switching

USB Transmission Only (Default)

Bluetooth Transmission Only

USB / Bluetooth Auto-Switching (Forklift Mode)

Sound Settings

Scan the barcodes to select whether or not the decoder issues a beep signal after a good decode. If selecting **Disable**, beeper signals are issued during parameter menu scanning and to indicate errors.

Medium Volume (Default)

High Volume

Low Volume

Mute (all sounds)

Battery Level Status

Scan the following barcode to send the current battery level information to your device.

Current Battery Level

Scan to receive the current battery level

Data Delimiter Programming Guide

By default, the scanner transmits a Carriage Return command as the majority of software systems use this command as suffix.

However, you can setup other prefix and/or suffix commands to delimit your decoded barcode data.

Please note: Any newly added prefixes/suffixes are added after and in addition to any currently set ones.

Should you wish to discard any existing prefixes or suffixes, please scan "Clear All Prefix/Suffix" barcode before proceeding to set new ones with the steps below.

To Append a Prefix or Suffix to scanned data:

Step 1. Scan the Add Prefix or Add Suffix barcode.

Step 2. Determine the hex value from the ASCII Conversion Chart, for the prefix or suffix you wish to enter.

Step 3. Scan the 2 digit hex value from the Programming Chart for the character.

Step 4. (optional) Repeat previous steps for every additional prefix or suffix character you wish to add.

e.g.

To add "Ctrl+A" as prefix, Scan 'add prefix', '9'; '7'; '4'; '1'.

To add "Ctrl+Alt+A" as suffix, Scan 'add suffix', '9'; '7'; '9'; '4'; '1'.

Please note: At most, 20 prefixes and/or 20 suffixes can be appended to scan data for use in data editing.

To set these values, scan a double-digit hexadecimal number (i.e. two bar codes) that corresponds to ASCII values.

See the Table 1 or Table 2 and Numeric Bar Codes in appendix.
