## Limited Warranty

Saveo BOLT has an extended 2 －year limited manufacturer warranty．This warranty does not cover any product which has been subject to improper use，neglect or unauthorized repair or installation．This warranty does not cover consumable parts．
（Cables \＆batteries are consumables．）

## Important Safety Information

＊Never put scanner in places of extremely high temperature．
＊The included charging cradle must be used indoors only，in fully dry conditions． ＊Never damage the internal rechargeable battery．Damaging the casing of the rechargeable battery might cause explosion or fire．
＊DANGER！Never directly look into the scan windows whilst the device is active．DO NOT point the beam at any persons or ane

## 

## Attach your phone to the scanner

Using the Universal Device Mount System
Each $3 \mathrm{M}^{T \mathrm{M}} \mathrm{VHB} B^{m \mathrm{~m}}$ mount plate requires a clean flat surface in order to create a permanant，screwless bond．Whilst you can choose to affix this mount plate directly to
the phone，we recommend affixing this plate to a rugged dual－layer or hard－shell device case as the screwless bond formed is permanent．

## Universal Device Mount Illustration

 A custom rugged dual case（SBBOO5）can be fixed－mounted directly to the top of the scanner．Dual layer cases have two components，an inner silicone cover and an outer layer of hardened polycarbonate．

The Phone and silicon cover are inserted into the outershell．＊

The hardened polycarbonate outer shell is attached securely to the scanner via a universal mount plate，which utilizes an ultra－strong $3 \mathrm{M}^{\text {TM }}$ bonding adhesive．

Rugged case not included

Connect your device using the Flex－Protect Micro－USB，USB Type－C or Lightning ${ }^{\circledR}$ cable．

Please Note：The wired connection supports charging on all connected devices and data transfer on USB OTG capab devices only

## Getting Started

Power On the scanner / set for your device cable type

## Connecting via wired USB HID (Android devices)

1. Press the scan trigger to turn scanner on. The scanner will beep once to indicate it has powered on.
2. Please select Micro-B or Type-C mode to set charge \& data for the device you wish to use with your scanner.

Scan the Wired USB HID Communication barcode below
||||||||||||||||||||||||
*IMPORTANT CRADLE CHARGING INFORMATION*
In order to support fast optimal device charging, Saveo BOLT's Charge Cradle has been designed to use the original manufacturers USB cable and power adaptor which was included with your specific mobile device.
Please optimize your device cradle charging experience with the appropriate cable type settings barcode, above.

In the case of using an Apple lightning device, a special cable kit add-on part (SCFOO3-KIT) is available to order, which includes:

- 1 x Premium USB Type-C cable (SCUSBC)
- $1 \times$ Flex-Protect Lightning device cable (SCF003)

| Indication | LED Color | Indication |
| :---: | :---: | :--- |
| Charging |  | Solid Amber LED (whilst charging) |
| Fully Charged |  | Solid Green LED (whilst charging) |
| Bluetooth Mode <br> (not connected) | Blinking Blue LED (whilst operating) |  |
| Bluetooth Mode <br> (Connected) |  | Solid Blue LED (whilst operating) |
| USB Mode Only <br> (not connected) |  | No LED (whilst operating) |
| USB Mode Only <br> (connected) |  | No LED (whilst operating) |
| Low Battery Alert <br> (-15\% Battery) |  | Blinking Red LED $(0.7$ sec intervals) |
| Low Battery Alert <br> (-8\% Battery) | Blinking Red LED ( 0.3 sec intervals) |  |

## Connecting via Bluetooth HID (iOS / Android devices)

Scan the 2 Wireless Bluetooth HID Communication barcodes below:

## Enable Bluetooth on your device

Go to your phone's homescreen and find "Settings", then "Bluetooth" and tur Bluetooth on. Your device will search for available devices within range.

Select BLT-****_*********** to connect
Saveo BOLT will appear as an external keyboard with a unique identifier mber (BLT-****-SERIALNO).
Select scanner from "Available Devices" and wait for pairing process to complete.

## Devices are now paired

Once "Connected" is displayed, your device is paired to the scanne.
scanner is now ready to use.

Please Note: Devices only need to be paired once. When they are within Bluetooth range they will automatically attempt to connect to each other. If yo wish to connect to another device, it is Unpairing can be performed by holding Unpairing can be performed by holding seconds.

Alternative Connection Modes
lease note: A compatible application is required in order to

## Reset to Defaults

Factory Reset to Defaults
To perform a factory settings reset, please scan the barcode below:

## Factory Reset Saveo BOLT Board

Please note: In order to perform a full hard reset of your device, please use the Advanced Settings document for your specific scanner model number, available for download at:
saveoscan.com/downloads

## Data Interface Modes

USB HID sends data to the connected device via USB Human interface device (Keyboard Input Emulation)

Your device receives decoded barcode data as if it were typed on an external keyboard. USB-OTG (on-the-go) support is required.

## 

USB V-COMM communicates to the connected device via USB Virtual serial port protocol.
Please note: A compatible application is required in order to use this connection method.

Bluetooth HID sends data to the connected device via Bluetooth Human interface device (Keyboard Input Emulation)

Your device receives decoded barcode data as if it were typed on an external keyboard.

Bluetooth SPP communicates to the connected device via Bluetooth Serial Port Protocol
Please note: A compatible application is required in order to use this connection method.

## USB / Bluetooth Auto-Switching

## USB HID Transmission Speed (Wired)

Transmission speed is dependent on your device. In order not to lose data please choose the correct speed. Mid Speed is the default.

## Bluetooth Transmission Speed (Wireless)

Transmission speed is dependent on your device. In order not to lose data please choose the correct speed. Mid Speed is the default.

## Data Operating Modes

There are two operating modes on the scanner, Data transmission mode and Data Storage Mode
Scan the appropriate barcodes when switching between these two modes.
Please note: Switching between modes will wipe the scanner's internal memory.

## Data Transmission Mode (Default)

The default setting is Data Transmission mode. In this mode data will be sent to smartphone/tablet directly.

## Enter Data Transmission Mode

## Data Storage Mode

In this mode, data will be saved directly to scanner's memory. Scan Transmit Memory Data to receive data stored on scanner's internal memory.

## Enter Data Storage Mode

Data Storage Mode Function Codes

## Power Management

Power saving mode is enabled by default and will put the scanner to sleep after 1 minute of inactivity. To wake up the scanner press the trigger
We recommend matching the Power Save timeout duration on your scanner and mobile device (Settings-Display-Timeout).

## Battery Level Status

Scan the following barcode to send the current battery level information to your device.

Current Battery
Level
Scan to receive the
current battery level

## Sound Settings

Scan the barcodes to select whether or not the decoder issues a beep signal after a good decode. If selecting Disable, beeper signals are issued during parameter menu scanning and to indicate errors.

High Volume

Mute (all sounds)

## Check Firmware Version

Scan the following barcode to send the current scanner firmware version information to your connected device.

## Get Saveo Firmware Version

Your scanner's firmware can be upgraded using a special application too available to download online at:
saveoscan.com/downloads
We only recommend upgrading your scanner's firmware if advised to do so by our support team or if you would like to obtain a new feature offered in a newer firmware version.

## Additional Documentation

Additional documentation including Advanced Settings barcodes and full technical manuals can be downloaded from

## saveoscan.com/downloads

Advanced Documents Include

- DATA SUFFIX / PREFIX PROGRAMMING CHART • KEYBOARD LANGUAGE REGION SETTINGS • SYMBOLOGY SPECIFIC SETTINGS - SCAN ENGINE SPECIFIC SETTINGS • MISCELLANEOUS SETTINGS
